SustainableEnergy

Imagine all the
tools you might need
to make your business
energy efficient

e.on

Now imagine
a partner that
has them all and
knows exactly
which ones will
help your business

A balanced approach from your energy partner

You already know that getting your business energy efficient can be a difficult and time-consuming business. We can take that burden away and leave you free to get on with doing what you do best - running your own business.

You know too that energy efficiency is not only about reducing costs and carbon footprint. It's also about compliance with increasing and ever changing regulation and finding ways to create additional revenues from the generation of your own electricity.

We can offer a complete end to end service or a specific activity to help meet your needs. We always balance the operational requirements of your organisation with routes to regulatory compliance and the drive to reduce costs.

From initial advice, measuring and monitoring, CRC management, FIT opportunities, design and installation of every kind of microgeneration to district heat networks and ESCOs, LED streetlights and energy connection, we can help. We can even support a complete sustainable city.

Current energy partners include -

- **Barratt Homes**
National developer
Managing low carbon community energy networks and customer billing for almost 3,000 homes across the South East
- **Greenwich Peninsula**
London Borough Council
Decarbonisation and energy strategy for one of the UK's largest regeneration projects embracing the O2 arena
- **Deutsche Bank**
Financial Services
Carbon strategy, and CRC compliance management
- **Vastra Hamnen, Malmö**
City Council
Management of a citywide district heating and cooling network and biomass energy plant
- **Stoke & Staffordshire**
City Council
Innovative low carbon streetlighting
- **Fairview Homes**
New Homes Developer
The design, build, operation and management of a low carbon community energy centre via an ESCo
