

"A free smart meter from E.ON has made it easy to see how I can improve energy efficiency and save money."

Paul Astley,
Paul's Barber Shop

Helping our customers.
We're on it.

e.on

Paul's Barber Shop is five minutes from Gateshead city centre and provides hairdressing services for both men and women.

Owner Paul Astley says:

"Our biggest cost is lighting and heating, but we also rely on electricity to run much of the equipment we use to wash, cut and style hair. Things like our electric clippers and hairdryers are running all day, along with our hot water.

"To help us control our energy use E.ON installed a smart meter, which along with the free independent energy saving advice from Gateway Energy Solutions, has really made us rethink how we use energy. It's encouraged us to take simple steps to reduce our energy use, like switching off lights when they're not needed.

"I switched to E.ON ten years ago and I've been happy to stay with them. Right now, I'm on a three year fixed contract. As a small business owner, it's important for me to know I'm getting the best possible deal so I often compare energy prices. E.ON have always been fair and honest and given me unbiased advice, even when I've found a better deal with a different supplier.

"E.ON have really taken the time to understand my business and any money I save can then be reinvested back into the business, so I really value E.ON's support."
