

# The complete solution for your electric fleet

***e-on***  
Drive

# Tomorrow's fleet is more efficient, sustainable and electric

Together, we can  
make it a reality.

Electric mobility continues to take off.

More and more vehicle manufacturers are releasing a variety of electric vehicle models, and government support is available. There's never been a better time to get on board.

That's why we offer E.ON Drive ElectricFleet, which enables your company to easily take advantage of all the benefits of an electrified fleet.

Whether for electric cars or commercial vehicle fleets, you too can benefit from the experience and implementation expertise that E.ON Drive has gained from installing and operating thousands of charging stations to this day.

Together, we are driving the EV charging infrastructure forwards.

**Your E.ON Drive team**

# How to charge

**1 Plug in**  
Connect your charging cable to the socket and your car.

**2 Select payment method and start charging**  
The light will turn blue when charging starts.

<b>E.ON RFID card or tag</b>	<b>E.ON Drive app</b>	<b>Debit or credit card</b>
		
Hold against the reader to start and stop when finished.	Download from the App Store or Google Play and follow the instructions.	Visit <a href="http://www.eonevpay.co.uk">www.eonevpay.co.uk</a> and follow the instructions.

**Unplug**  
Disconnect the cable from your car first, then from the charging socket.

# Your worry-free package

## From the workplace to the home

### **Does having an electric vehicle fleet sound complicated?**

It doesn't have to be. From charging at work, home or for the journey ahead, we include everything that your company needs to make the switch.

We'll install chargers in your company car park, provide your employees with access to on the road charging and install chargers in private parking spaces at homes.

You can always see where charging takes place and for how long, as well as how much power is actually being consumed. Your employees enjoy the convenience of being able to travel around without worrying about charging, and you benefit from capable implementation from a single source.

## Charging at work

Developing the EV charging infrastructure at your company site.

We provide tailored charging infrastructure and take over planning, installation, maintenance – including load management and flexible access management.

## Charging at home

Allowing drivers to charge at home.

We simplify the EV home experience for your fleet drivers with a digital ordering process, professional installation and provide reimbursement data.

# Expert advice

One contact for everything: We support the electrification of your fleet with our consulting on charging infrastructure and on all EV charging related topics.

# Billing & Reimbursement reporting

Comprehensive data for your fleet management. You'll receive sustainability data to help you with your Environmental, Social & Governance (ESG) reports, and a full overview for fleet reporting and associated billing.

## Charging on the road

Accessing the wider public charging network.

With the E.ON Drive app or RFID tag, your employees can easily charge their EVs on the road – within a continuously growing national and European charging network.

## Green Energy Solutions & Commodity

Improving your environmental footprint.

For CO<sub>2</sub>-neutral EV driving, all your charging stations can be supplied with green energy from on-site generation combined with energy storage systems.

# A practical solution at last

## E-mobility in your company

Since 2018, E.ON has been a proud member of the Climate Group's global EV100 initiative, which aims to make electric vehicles the new norm by 2030. In order to lead by example, we are gradually electrifying our own fleet of vehicles and our company locations. For employees, visitors and customers alike.

**CLIMATE GROUP**  
**EV100**

## An electric fleet offers numerous advantages for companies:

The CO<sub>2</sub> savings are an obvious benefit, and these only increase when combined with green electricity, helping you to achieve your sustainability goals more quickly. Lower noise and pollution levels are additional advantages of switching to this mode of sustainable transport.

A fleet of EVs also provides an economic advantage, since you save on long-term operating and maintenance costs.

The rapidly growing choice of electric vehicles combined with government grants are making electric vehicles an increasingly attractive option for your employees as well.

Make sure you're ready to embrace the change.

# A summary of the advantages you gain with E.ON Drive ElectricFleet

## **Integrated solution**

Charge at every charging station with the E.ON Drive RFID tag. At home, at work and on the road.

## **A worry-free package**

The 24/7 service hotline and remote troubleshooting will resolve your concerns in a timely manner.

## **Digital planning tool**

With our digital planning tool, you can quickly and easily obtain an initial charging infrastructure plan for your fleet. The final dimensioning is then taken care of by an expert on-site.

## **Dynamic load management**

By optimising the utilisation of available capacity, you can install up to eight times more charging points at each of your locations. This reduces operating and installation costs.

## **White label options**

We can offer you an attractive co-branding digital customer portal and charging stations.

# Designed for fleets

Everyone benefits: Fleet managers, employees and the environment

## Fleet manager

As your proportion of electric vehicles increases, so do your efforts towards ensuring sustainable practices; at the same time, your company benefits from reduced consumption and maintenance costs. We'll be happy to provide you with a bespoke quotation.

## Employees

Help your employees to make the switch to electric vehicles and benefit from tax breaks for company cars.

## Decision-makers

With an electrified fleet, your company becomes more innovative and you build a sustainable image that is attractive to young talent. Our complete solution involves less effort for you and reduced long-term costs.

## Facility managers

We will develop a modular and future-proof solution that is tailored to your location and requirements.

# ElectricFleet at a glance

## Start without risk and grow in a modular way

Thanks to our E.ON Drive flexible solutions, you can get started with an electric fleet at your convenience and with no risk – even on a small scale.

Select and combine the three modules Charging at work, Charging on the road, and Charging at home to best suit your fleet strategy. Your E.ON Drive solutions can then grow to meet new requirements and increasing demand from your employees. Modular, transparent and future-proof.

## Customised digital journey

We'll create a dedicated digital journey for you, through which employees that you select will be able to conveniently and independently set up E.ON Drive accounts and charging stations for their home use.

## Charging at work

With our custom charging stations, your employees, visitors and customers can charge conveniently at your company's car parks.

We supply modular installation and operational management packages to ensure professional installation and smooth operation (including online management, hotline, maintenance, billing and dynamic load management).

## Charging at home

As well as the dedicated digital journey for your company, at-home charging uses domestic electricity.

Any reimbursement for company vehicle charging is transparently recorded based on kWh usage.

## Charging on the road

With the E.ON Drive app your employees will have access to over 400,000 public charge points across Europe.

Your company is billed directly for electricity used when charging over the course of journeys – as simply and transparently as you are used to with conventional fuel cards.

# Charging at work

## Easy for drivers

- ✓ Charging of company cars, employees, guests and external visitors at the company location
- ✓ Authentication of the charging station via E.ON Drive app or RFID tag for easy access and payment
- ✓ Charging data for company car drivers
